THE POLLUTION OF WILDCAT CREEK

The matter of whether to allow the proposed mobil home park on Wildcat Creek west of town has passed from the County Commissioners to City Commissioners and regional boards, but the decision is yet to be made. This has gone on since last winter.

Since it is obvious to Manhattan-Riley County Health Department that unfiltered sewage dumped into the creek would pollute it—why do two sanitation engineers say that in view of state regulations, the sewage system would be okay? What is the problem here? Inadequate laws, misinterpretation of laws, or just plain abuse? If you are interested in stopping pollution lets start right here. How many kids do you know in town and around that play in that creek?

The Free University believes in education of the whole individual so that he will understand his role in a changing society and his role as a growing individual.

We aim towards a society:
Where man can rationally choose and create his own values and ideas.
Where man can communicate himself to others and in turn understand their dreams and disappointments.
Where man can relax and develop his own creativity and interests.
Where man can understand society and make it a better place.

It is up to each person to develop what he does best or whatever he finds most rewarding. He also needs to be aware of himself as an integral part of the family of man.
