The only prerequisite is curiosity
No tuition... no grades
**UVM HAS A NEW HOME**

This summer UVM moved from the Baptist Campus Center to a large white house just up the street at 615 Fairchild Terrace. This isn’t the same as Fairchild Street, but it is nearby.

At last we have a home which comes complete with a kitchen for cooking classes, arts and crafts space for candle-making, knitting, etc., and a library which contains the latest in educational periodicals and books, a new political science collection donated by Doug Douglas, sections on women, ecology, Black, science fiction, crafts and skills...and two dogs in the yard. Come by and visit us, but ride a bike or walk if you can. We have a terrible parking problem.

**THE MAP**

**PEOPLE’S RESOURCE LIBRARY**

Here’s something to watch for...this year, a directory of people from the community and the campus who are willing to share and teach others skills, hobbies, and other interests that they might have. This directory, a joint effort of the University for Man, University Learning Network, and the Union Program Council, will have topics such as “photography”, “frogs”, “gardening”, etc. under the names of those who have expressed the most interest in them. This will be a way for you to find others with similar interests or someone who can teach you what you’ve been wanting to learn.

If you’d like to help us put this project together or be the first to list your skills, are, stop by the Union Program Council for registration and let us know. The directory would enable you to seek someone (or you or someone else you know) to learn about these topics who is interested in common exploration.

**TEACHING AS A SUBVERSIVE ACTIVITY**

Discussion of Postman and Weingartner’s book by the same name. Anyone (hopefully high school and college students, teachers, professors, administrators, parents, and other interested laypeople)—anyone who is interested in learning about the schools and educational institutions, teaching environments, etc., and who would like to kick around some practical ideas for educational reform, is welcome. First meeting: Monday, 7:30 p.m. at UVM Center, 1031 Demarest. Co-ordinator: Warren Kempf, 539-8289.

The only fee will be the cost of the materials. Co-ordinator: Heather Potter, 530-8630. First meeting: Wednesday, 7:30 p.m. Contact co-ordinator.

**FREE SCHOOLS**

This summer the UFM staff and friends visited 25 free schools in the Midwest area. These schools, usually founded by parents, are set up outside of schools and colleges. The future of public education and the free schools will have a profound effect on our society.

6-encounter

"FURIOUS" AND ENGAGED COUPLES

Six couples will explore the emotional interaction of their relationship for the purpose of their own growth and enrichment and preparation for marriage. The concepts of "I'm O.K.-You're O.K." transactional analysis will be used in understanding parent-child or sibling responses. Questions of intimacy, handling anger and love feelings, sexual attitudes, psychological differences between the sexes, male-female roles will be considered. The group will meet informally for a weekly sack lunch.

First meetings: Wednesday, 12:30-1:30 at the UMass Center, 1031 Denison. Co-ordinators: Don Fallon, 592-4911.

"I'M O.K.—YOU'RE O.K."

A new breakthrough in the understanding of human relations, a fresh approach to the problem that every human being faces everyday in his relations with himself and others. Transactional Analysis is a way of perceiving oneself, one's relations with others, one's not-ok feelings about oneself and how to deal with them. Confronts the individual with the fact that he is responsible for what happens in the present and in the future, no matter what has happened in the past. Understanding of the "Parent", "Adult", and "Child" within each of us, constitutes the basis of new relationships and new freedoms from past perceptions of ourselves. First meetings: Tuesday, 10:30 am at UMass Center, 1031 Denison. Co-ordinators: Warren Scogna.

hello, said i, to the girl before my eyes
and she looked at me wonder-like
i was and i not feeling a bit a part
sad do not fear our separate ness
for it is there.

GAY CONSCIOUSNESS

Since last December a group of gay people have been meeting weekly. Each of us has come with different needs and expectations. As a result we have done a variety of different things together. Also, we've spent a lot of time just talking and sharing experiences. There has been the growth of a certain level of Gay Consciousness. Gay Consciousness is the growing realization that gay people are not alone (there are and always have been gay people everywhere, although some of us are just becoming aware of this fact). In addition, we need to learn to support and accept each other regardless of our various differences. Consequently, we are going to continue meeting this fall and we hope that more gay people in the E-State and Manhattan community will come out and join us. If you are interested in meeting with us this fall or if you just want information, call 529-1866 or write P.O. Box 54, Manhattan, and we'll contact you.

CLASSES BEGIN SEPT 23-29
We have lost the concept of the "whole earth" of which we are a part. Consequently, we have lost touch with the unity of our natural environment. Because we tend to look at nature through a lens that is made for only short periods of time, we see it in an atomized, stationary state. We fail to perceive it as being a changing, living, evolutionary organism.

Our senses seem to only have one dimension. We experience only the surface features and accept them as complete. We fail to realize nature's timelessness, its all encompassing force. Nature is no longer the home of man, he has segmented and isolated himself away from it. It is concern for it is seen in the way he treats the streams, air and earth. Man no longer knows what it is to live in harmony with nature; he knows only of dominance over it.

If man is to survive he must return to a more natural state (either physically or mentally), with an understanding of his intimate relationship with the Earth, and with the basic relationship that humans form only one humble part of the cycle. He must re-learn that a shackle of wheat is not really what it seems, but may instead be a part of a leaf that fell from the old oak tree many centuries ago, or that the oxygen he is breathing is fresh but not new; it may have been created a hundred years ago by a plant thousands of miles away. Man must realize once again that everything is connected to everything else - everything relates. He must put himself back in contact with a more natural order.
