If you are interested in this program, call Karen Ramirez, 539-2905.

MANHATTAN DAY CARE
Manhattan Day Care Inc. serves approximately 25 children, 3 to 6 years old. Volunteer help is needed throughout the week, especially evenings and over the lunch hour. This program will also give many people the opportunity to hear and see hard drug users view their situations.

This is not a program setup to tell you not to use drugs, do you know how bad drugs are for you? This is a program setup to help you find out what is going on when you make the choice of what direction you will be taking.

Larry Dixon, Director, 776-6391.
ARTS AND CRAFTS C/O UP

The Arts and Crafts Co-op is still trying to function but your help is needed if it is to stay alive. This co-op was founded on the theory that students, teachers, and citizens of the school district want a group to sell their craft or service. The co-op needs only a little of your time. We find that once a craft or service is advertised and then everyone comes and sells their own work at whatever price they wish to ask. We do not teach any classes but rather try to work with existing UPM classes and help start new ones when interest is shown. If this sounds like something you would like to do, please come to our organizing session, Sunday, February 6 at 5:30 p.m., at 815 Fairchild Terrace. Co-ordinator: Art Billott, 776-4435.

CONVERSE MAKING CLASS (SAND CAST AND FOIL OBJECT FORMS)

ENVIRONMENTAL AWARENESS CENTER

Environmental issues, that will affect all of us, are being widely discussed. Many requests for information and/or speakers have not been fulfilled, in the past, because no central environmental agency existed. The purpose of this center is to rectify that situation by supplying information, speakers, and by organizing projects. Some of our plans include:

Establishing a library of environmental books and periodicals on campus and the community libraries.

Helping to locate speakers of interest to the community. A committee to clean up and beautify the university owned Mohawk Park (Top of the World).

A group is needed to collect used paper. Organizing a ban on non-returnable containers from campus and the community.

A group is needed to plant trees in "new parks" on campus. Credit is available for the second group.

Sign up for the registration and you will be contacted. Center address: 213 Ackert Hall, 532-4629. Coordinator: Low Martin.

POLICE STUDENT HELP SESSION

The police department of Manchester, N.H., would like to involve students and people living in this community in their police-community relations program. This program involves formal "rap sessions." These sessions are intended to bridge the gap between police and the people, hopefully to make Manchester a better community in which to live. This need is not going to happen. It must be law and order through justice. We encourage you to sign up. The number of people signing up will determine when and where the first meeting will be held.

LIFE PLANNING WORKSHOP

The life planning workshop is designed to involve the individual in the process of influencing his own future. The majority of people don't think of themselves as actually creating their own future, but rather, just let it happen to them. In the life planning workshop the individual is encouraged to reach the realization that he is the one responsible for his own life, and consequently is capable of creating the future he wants for himself. The workshop involves a series of structured exercises lasting 7 to 8 hours. Sign up at registration. Co-ordinator: Bill Ogo, 532-6432.

"I'M OK — YOU'RE OK"

A breakthrough in the understandings of human relations, a fresh approach to the problems that every human being faces every day in his relations with himself and others. Transactional Analysis is a way of perceiving oneself, one's relationships with others, one's or another's feelings about himself and how to deal with someone. The individual with the fact that he is responsible for what happens in the present and the future, no matter what has happened in the past. Understanding of the Parent, Adult, and the "Child" with each of us, constitutes the basic of new relationships and new freedoms from past perceptions about ourselves. First meeting: Saturday, April 7, 10 a.m. at UNH Center, 502, Denison. Co-ordinator: William Temple. Limited to 16 persons. HUMAN RELATIONS: A WAY TO BETTER RESIDENCE HALL LIVING

All freshmen at KSH must live in a residence hall (unless they meet a certain criterion). This can be an experience approaching the traumatic. The question I ask myself daily is "How can I make this experience better for all residents?" and not Freshmen. It is only one of many that are related to the understanding of human interpersonal relationships must be concerned in answering this question. Do you have another consideration concerning this problem? Do you agree with me? If you do not, I would like you to read especially this text. Assistant Director of Residence, 5th Floor, Moore Hall, Instructor: W. and M. Joe Neil, Assistant Director, Moore Hall.

Have you had it all backwards? Does religious truth elude you? Can we be for real?

Today we will pick up where we left off last week. We will examine our own words and discuss what others have written about man.

We will also talk about religion with topics like: what religion means to us, a comparison of religions, world religions, the Bible, and the church. We will discuss the role of man in history and the future of religion.

SIN, SALVATION, GOD THE FATHER, AND ALL THAT JAZZ

You won't forget that Sunday school teacher with her pet parrots wrapped up in gypsy, warped words like sin, grace, grace, and God? You didn't have much of a life or have you?

Christianity's got to mean more than that and what's more? More of this puts their ideas in synch with my own.

We'll talk about the role of man in history and the future of religion.

Tuesday, 6:30-7:30 Bible Bible Race Tuesday, 11:30-12:30 Fellowship Bible Coffee Wednesday, 7:30 a.m. in all campus churches.

EDUCATION

FILM SERIES

"No Reason to Stay"--February 29, 1977 and 7:00 p.m. in the Forum Hall Union.

A look at the school dropout and what he drops out from. This film takes a well-aimed, critical look at today's educational system and how it fails. Is it true, to give young people the experience they need for adult life when school doors close behind them.

British Infants School--March 7, 2:00 p.m. in the Little Theater, Union.

7:00 p.m. in the Forum Hall Union.

The open doors of the classroom, the overflow from the classroom environment, the use of the whole school--all the ways of the ways of the ways of the ways that are original to and natural to the child, maintaining and continuing them, putting them into the material world, providing for the purposes of and learning from the child's play. This film documents the fulfillment of that intention.

"Summertime"--April 18, 1977 and 7:00 p.m. in the Forum Hall Union.

A visit to a school without fixed rules where no one really tells the children what to do. The educational system is a living, breathing, growing thing. The school is a community of care.

This film documents the fulfillment of that intention.

FREE SCHOOLS

Since the summer of '71, UPM has been visiting with and sharing ideas about free, primary and secondary schools in the midwest. UPM's involvement with education below the college level developed naturally out of their desire for education that promotes the individual abilities of students and teachers, encourages student choice and authentic self-motivation, deemphasizes competition and extrinsic motivation, and is less creative and rigid.

What follows is some excerpts from a UPM publication to be available in late February. Hopefully, the writings on this page will give you an impression of the nature of open classrooms and free schools.

AN INTRODUCTION TO OUR RESEARCH

We who collected this information hope that it would be helpful to anyone desiring to start a school. The task of starting a free school is not an easy one. Every step of the way is fraught with problems: funding, accreditation, incorporation, finding a building, deciding on what ends and how children are to be taught. Developing satisfactory teacher-parent relationships, etc. And yet whatever information we have collected will be found in this open classroom model. The first, in Conway Springs, we have visited twice, in the fall of '70 and '71. The other, in Workshop, we have visited only once, therefore, are prone to describe it with less accuracy and less enthusiasm.

OPEN CLASSROOMS

Not every public school teacher desires or can quit their job and teach in a free school. Nor is it necessarily desirable that they do so. It is unlikely that public schools, as an American institution, will soon disappear or cease to exist. Therefore, the task of public schools will be to complement the changes that are going on in free schools.

What follows is a description of two public schools, both in Kansas, that follow an open classroom model. The first, in Conway Springs, we have visited twice, in the fall of '70 and '71. The other, in Workshop, we have visited only once, and therefore are prone to describe it with less accuracy and less enthusiasm.

FROM CONWAY SPRINGS: KYLE THORNTON ELEMENTARY SCHOOL

One thing we saw:

* Racks of paperback books placed in the hallway so that students, on their own, could check them out and return.

The administrators reported that they have sent out more books and have lost only a few.

* A teachers aide, hired to "free lance" in the school.

He may be found reading, talking with 7-8 kids in a class. In his office, counseling kids in what is called: "Are you doing sessions?" Several students painting a mural on his office wall, or with students, painting on easels set up in the hallway.

* The school has sent out cards to parents of kids at the school. The card describes what they are trying to do at the school and asks the parents for help. The card lists several ways that parents may help: coming to school and making apple cider with the kids, or if you want to be at home or work during the day making cookies and having someone bring them the next day. The response to the card was good. They hope to get the parents involved. They see it as a good idea if they want to overcome the anxiety of the parents towards a new form of education.

Another element of teaching is the structure. Emphasis is placed on a structure that will allow children to learn from each other. Given more freedom of expression children learn about their own emotions as well as those of others. A vital role for the teacher is to provide the atmosphere and the environment conducive to effective learning. Some free schools provide a math and reading lesson while other schools have no special times but may have individual plans for each student and an individual hour is spent in a teacher-student conference to help with any problem. In this type of an open flexible structure it is hoped that child will be given the maximum opportunity to discover what he is and what he wants to be. One school put it this way: "We hope students will grow personally and learn to face themselves, to communicate, to listen to others, to listen to the feelings of others, and to develop mutual respect and understanding." So free schools are not unstructured chaos, but rather exist by the material and the environment provided by the teacher as each student pursues his own interests and deals with his own unique needs.
