ufm philosophy

Only too often do we all freely criticize the educational system, and only too rarely do we propose anything concrete to improve it. Too often, do we forget in our action to achieve the aim all we agree are worthy.

For us, as people of different ages, backgrounds, and beliefs.

In most classes, the relationship between the teacher and the student is informal and both take responsibility for the success of the class; the "students" often teach the "teacher" a thing or two. Everyone is a student, everyone is a teacher.

Because there is no tuition, no credits, and no grades, the free university is one of the only systems where the teaching more reflects the interests of the students. Rewards are internal, and longer lasting.

Education is a process of creating learning situations and acquiring knowledge so that we are capable of using and sharing the knowledge for the betterment of ourselves and our society.

ufm is supported by fees from students governing association and by the division of continuing education at Kansas State University.

COMMUNITY

PERSPECTIVES ON KANSAS COMMUNITIES

A major weakness among many social scientists is that a great deal of their work is shared only among other social scientists. Their work is a specialty, written up for academic purposes, and not available to the public. It is not published in a form that can be shared with everyone outside the field that we have on Kansas Communities. The initial meeting will consist of various resource people talking about what they are up to, either working with community projects or doing research about Kansas Communities in general and Manhattan in some particular cases. Then as a group we can plan the remainder of the series. Potential areas are: residents of Manhattan, the plight of the aged, K. Power and community organization, voluntary associations, minorities in Kansas Communities, community crisis centers, and community mental health. Community services for the Family.

SECRETARIAL TECHNIQUES

There may be occasional classes between the hours of 8 a.m. and 5 p.m. Monday through Friday, for which you may call 724-1710, 539-1903 after 5 p.m. and all day Saturday. This is the only way you may register for the course, as we will not be having enrollment during any registration. A schedule of classes for the secretarial techniques course is available in many classes as you wish. All classes will be held in the K-State campus. MANHATTAN FOOD CO-OP

During spring and early summer of this year, a group of people from the community have been realizing the benefits of buying food cooperatively. Food is bought in bulk quantities from a Manhattan wholesale food distributor, Great Plains Grain Co., local farm markets. It's a gold cheese factory and members of the co-op may have surplus garden vegetables. The produce is of excellent quality, the eggs are farm fresh, and there is a variety of grains, flours, cereals, oils, also available. Members volunteer their labor so that a great savings on food is possible. Here are some of the current prices: fresh eggs: 40c doz.; stone-ground whole wheat flour: 16c lb.; wheat germ: 10c lb.; apples: 24c lb.; tomatoes: 25c lb.; Muenster cheese: 85c lb. Interested persons should stop by the co-op house at 630 Fairchild Terrace between the hours of 1-3 p.m. every Saturday. There will be people who will explain the operation of the food co-op and help you place an order. You may pick up information, including price lists, any time during the week. The more members, the greater assortment of food items you'll have to choose from.

the photographs

For this summer's UFM brochure I have concentrated on communicating the different forms and textures that leaves have as a result of the different densities of light and shadow that they hold. Instead of photographing leaves as botany I have tried to photograph them as patterns and shapes with different textures - and because of the different densities of light - with different compositional arrangements.

So they're not only plants, or leaves, or trees, but also visual abstractions, there for all of us to see. I have learned that I can see these arrangements easier if I don't look at them with preconceived notions of what they are, such as a cactus plant or an elm leaf, but if I approach them instead as if, for the first time in my life, I'm seeing in front of me this thing manifesting a multitude of forms and textures.
