university for man

summer '77
small is beautiful

Our theme for this summer, "small is beautiful" represents our concern and our attempt to highlight what many people are saying: We can't continue to use energy at our present rate of consumption. President Carter has already taken steps in the "small is beautiful" direction by proposing heavy taxes on gas guzzlers, tax incentives for using solar energy, as well as other conservation measures.

We still have a long way to go — but exciting things are happening — even in Manhattan, Kansas. Several thousand people attended the recent energy fair; interest in energy and self-sufficient courses and projects is skyrocketing; and there are several energy-efficient houses in town — and many more projects are planned.

All this does not mean a return to pioneer days, with long work days, accompanying diseases, death rates and hard times. There is little glory in drudgery. What this does mean is to try and become more aware of our own personal and local resources — and in many small ways do the things we can for greater conservation and self-sufficiency. Here are some suggestions:

- Buy a sturdy shopping bag. Use it on shopping trips to avoid paper bags which end up being thrown away.
- Use other ways to cool this summer other than running on the air conditioner. Plant trees and shrubs on the south side, use light colored鹌鹑 to reflect heat, slow down, close curtains and windows in the morning to keep evening’s coolness...go swimming.
- Recycle. Your house, your clothes, your leaves, your car, your books, your washer/dryer. Do this through auctions, garage sales, yard sale, clothing distribution, consign, and garage. Avoid products you can’t recycle.
- Support your local merchants. By keeping money in your town, you decrease your dependence on outside influences. This also cuts energy used to ship from distant places.
- Plant a garden. Use low energy technology (hand cultivators, solar dryers, elbow gloves) to mulch and harvest it. Share surplus with friends and neighbors. Sell food can be planted until late July and August.
- De-gadgets your house. Determine which appliances actually use less energy and which are energy wasters. Manufacturers will continue to make unnecessary gadgets as long as we continue to buy them.
- Take a UM course. In each section of this and every brochure you will find courses and projects which will increase your self-reliance and conservation efforts.
- Hide your car keys in a hard-to-reach place and see how many days you can go without driving. In case you’ve forgotten, bicycling and walking are perfectly good means of transportation. If necessary, why not use carpools.
- Harness the sun. It’s free. Use it to heat your home, dry your clothes, dehydrate your food, heat your water, and grow your garden.
- Read Schumacher’s book "Small is Beautiful".
- Teach a UM course. Share your skills and what you know directly with others without tuition, grades, or examinations.

"In the simple question of how we treat the land, next to people our most precious resource, our entire way of life is involved, and before we can make any deeper and lasting changes, there will have to be a great deal of philosophical, not to say religious, change. It is not a question of what we can afford but of what we choose to spend our money on."

UPPER END MANHATTAN

Doris Newman

Mondays, 7:00pm

Length: Indefinite

First meeting: June 27

Location: 521 Pettit Avenue

It is hard to believe that a city as huge as Manhattan has no regularly scheduled bus system. With the steadily rising cost of new cars and gasoline, the only feasible solution (after walking and riding a bicycle) is to use mass form of public transportation. The committee of the Upper Manhattan Neighborhood Association plan to meet and coordinate with the transportation committee of the Upper Manhattan Neighborhood Association to explore what the transportation needs of the Upper Manhattan area are, what has been tried in the past and what are different, possible solutions. City officials will be invited to attend and explain their position regarding public transportation for Manhattan. (Doris has lived in several other cities with fine bus systems and would like to help establish one here.)

SCHUMACHER suggests that the current economic system is based on 19th century notions which so no longer appropriate, that increasing corporate profits are in tension. In maximum harmony for most of us. The alternative, according to Schumacher, is self-sufficiency and public ownership of corporations. He argues that if a person is interested in alternatives to the current economic system, he or she will talk to others. (She has read the book and would like to discuss it with others."

"HEALTH"

Part of "Small is Beautiful" is to find ways to be less reliant on large systems that take away our control of our life situations. This series is inspired in part by seeing people who use them. It's a search for personal self-reliance and by this desire for self-reliance on our own. It's a journey to discover how to use common sense and to make this journey easier. (Workshop)"

who we are
University for You is one of the largest and oldest free u's in the country—our cost savings, self-directed experimentation, and the sense of community give our students an opportunity to learn in an environment that benefits all. At free universities there are no grades or degrees, and the classes are self-paced as much as on the leaders. UMY is now in its tenth consecutive year of providing an important alternative to traditional education in Manhattan. The staff invites all to join us in exploring new ideas and sharing the open minds you already have. UMY's main focus of existence is built on the sense of community the program and staff is trying to build. This is why we are particularly aware of and grateful to those of you who volunteer your time in the office, or a gift project at a school, or a family or community to the sharing of our resources. And, of course, we are continually amazed at the generosity and spirit of those of you who teach our classes. Thanks to all of you who support us through your good thoughts and wishes. UMY receives funds from the ESU Division of Continuing Education, Student Government, the Manhattan Chapter of the United Way, the Department of Human Resources, ACTION and the Fund for the Improvement of Post-School Education. Because of these groups and the individuals who contribute to UMY as a free nonprofit group, we are alive and well. We extend a warm thanks.

We've recently welcomed Tom Burt and Lisa Barnes, who work with the high school and the ESU campus, respectively. They'll be managed created by the departure of Miriam Shaefer and Steve Burt. We will miss Steve and Miriam and wish them well on their new undertakings.

women's center
The women's Center of Manhattan has found a home in the Family Resource Center of 611 Perry St. A meeting room is available for interested women's groups and may be scheduled through UMY. Summer plans are to build a developing information and referral service, a drop-in library and women's support programs.

"grassroots education"
With help from the Fund for the Improvement of Post-Secondary Education, UMY has recently released a 16mm film entitled "Grassroots Education." "Grassroots Education" tells the story of UMY and the rural free university community education project—how they are grown, who they are, what they do and what happens to people and communities when grassroots education becomes available to them. The film may be received through the UMY office for free on a small fee.

evening child care
The child care center is open and going strong. We provide quality care from 6-6:30pm Monday to Thursday, and from 6pm to 8pm on Fridays. All community members are urged to use the center; reservations are needed. Call UMY or the center for more information. Laura Stud, who's been hired as the center's director, has made the center's positive force with her creativity and knowledge of children. We are making our best to provide guidelines for a 5000 community development grant which will enable us to stay open until next summer at which time we will try to achieve self-sufficiency. Your encouragement is appreciated and volunteers are always welcomed. The center is located at 201 W. 4th and the telephone number is 578-4116 after 6pm.
