This class will focus on the basic concepts of photography and using your camera. To get the most from the class, participants should have a digital camera that users can set the f-stop and shutter speed for (DSLR’s and most advanced compact cameras will have a manual, aperture priority or shutter priority mode that will work for this). If you aren’t sure if your camera will work for the class, don’t hesitate to ask.

Topics that will be covered in the class are how f-stop, shutter speed, and ISO work together to determine a photographs exposure, how these settings can influence the look of your photo, how to take control of your camera and set the f-stop and shutter speed, how to use ISO, what white balance is, and how in-camera processing settings can impact the color of your photographs. The class will also cover controlling your exposure, using your histogram, bracketing exposures and working with light. The last part of the class will introduce some basic concepts about composition and creating the photograph you want.

The class will include 4 classroom meetings (Thursdays) and 3 optional field trips (Saturdays) to practice what we cover in the class meetings. Participants need only to bring items that they would like to imprint in the wet clay. The masks will then be fired and a week later be ready to be painted and decorated. On 4/23/14 class meets from 5:30pm to 6:30pm and 4/30/14 from 5:30pm to 7:00pm.

Solar Electricity 101: 
for Your Home & Business 14AEN114
If your image of solar energy is flattened beer cans and shrink wrap think again. Whether you are concerned about energy independence, climate change, national security or just your own pocketbook, renewable energy is enormously popular for people from all political parties and backgrounds. We will also discuss lessons learned from eight different Manhattan systems... some of the first in Kansas. With step-by-step photos of designing and installing solar electric systems using the latest hardware, we’re going to discuss the advantages and disadvantages of various choices. We can also talk about how these systems compare with battery backup or independent systems. Come with questions and new information for discussion. **Reliable Recalls for Your Dog**

Calling your dog multiple times with no success can be frustrating and time-consuming. Plus, an off-leash dog without a good recall is a safety risk for itself, other animals, and people. What is a reliable recall? It's when you call your dog once and it runs straight toward you as fast as it can. It then stops within reach so you can grab the collar and clip on a leash if necessary. A solid recall may save your dog's life and your sanity. Dogs who master this skill have more freedom because they have the privilege of being off-leash on occasions when it is safe and legal. As the owner, you can relax knowing that your dog is just a call away. The recall command is one of the five basic pet behaviors that every dog should know. Bring your dog and let's begin! Requirements: Your dog must be up-to-date on all vaccinations. Records must be provided to UFM Community Learning Center at the time of enrollment. Records can be faxed to 785-539-9460.
